OBJECTIVE

Entry-level Software Developer with a strong foundation in Software Development Life Cycle (SDLC) including design, development, testing, deployment, and application support. Proficient in JavaScript, and Node.js, with hands-on experience building and supporting scalable applications

EDUCATION

Sri Ramakrishna Institute of Technology

June 2024

Bachelor of Engineering in Computer Science and Information Technology

GPA: 7.6/10.0

SKILLS

Frontend: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap, Responsive Web Design.

Backend: Flask(Basics), Node.js, Express.js.

Programming Languages: Python, JavaScript (ES6+).

Databases: MySQL, MongoDB, Firestore.

Software Development Concept : Software Development Life Cycle (SDLC), Object-Oriented Programming, Agile, Debugging, Code Optimization, Testing.

Backend & Cloud: RESTful APIs, System Design, AWS (basic).

Version Control: Git, GitHub.

PROJECTS

Daily Expense Log (<https://daily-expense-log.vercel.app/>)

- Built a full-stack expense tracking application using MERN (MongoDB, Express, React, Node.js) enabling users to manage transactions with real-time CRUD operations and JWT-based authentication.
- Implemented secure RESTful APIs (10+ endpoints) for expense, income, and user management, reducing data retrieval time by 30% through optimized MongoDB queries.
- Designed responsive UI with React Tailwind CSS, improving user interaction efficiency by 40%, and deployed using Render (backend) + Vercel (frontend) with seamless API integration

Taxi Booking Application

- Developed and tested application features for real-time booking and location tracking.
- Ensured application responsiveness, availability, and maintainability through testing and optimization.
- Analyzed functional issues and enhanced user experience through iterative improvements.

INTERNSHIP

BlackStone Infomatics

Feb - Apr 2025

Software Developer Intern

- Participated in end-to-end SDLC activities including design, development, testing, release support, and maintenance of application modules and followed coding standards and basic compliance guidelines.
- Analyzed application issues, validated root causes, and proposed code-level and functional improvements in collaboration with senior developers
- Performed testing, debugging, and troubleshooting to resolve defects and support stable releases. Collaborated with cross-functional stakeholders during Agile sprints, code reviews, and documentation activities.

CERTIFICATES

Programming with Python – Internshala Certificate

Business English Certificate – Preliminary Exam

Web Development with MERN Stack – Ongoing (Udemy)

Dart and Flutter – Completed (Udemy)
